1. Hettich data package Version 5.3

This documentation gives an overview of the Hettich fittings & Hettich connector sets of Drawer systems & Drawer runners in this package.

Hettich fittings:

The table will show you the order number, the description and the connector name in imos. For the connectors with design information it is possible to identify if processing is done or DWG's are used.

The first part includes the connectors with constructive information. Along with commercial information it includes the necessary editing groups, DWGs and attributes.

The connectors with constructive information are sub divided in fitting groups. Within each group the connectors are further sorted in ascending order as per the order number.

The second part includes the connectors with gerneral information i.e. only commercial information. These connectors are sorted according to the order number only.

Hettich connector sets:

The table will show you the connector set name, the associated connectors and if connector sets have the same associated connectors, the difference between those connector sets.This will easy to suggest which Hettich connector set are suitable for the construction by analysed and compared with the characteristics
