1. Hettich data package Version 5.0

This documentation gives an overview of the Hettich fittings, Hettich connector sets and Hettich sample articles that you get in this package.

Hettich fittings:

The table will show you the order number, the description, the connector name in imos and the catalogue page. For the connectors with design information it is possible to identify if processing is done or DWG's are used.

The first part includes the connectors with constructive information. Along with commercial information it includes the necessary editing groups, DWGs and attributes.

The connectors with constructive information are sub divided in fitting groups. Within each group the connectors are further sorted in ascending order as per the order number.

The second part includes the connectors with general information i.e. only commercial information. These connectors are sorted according to the order number only.

Hettich connector sets:

The table will show you the connector set name, the associated connectors and, if connector sets have the same associated connectors, the difference between those connector sets.

2. Connectors with constructive information

Sliding & folding doors

Order no.	Description	Name_imos	Page	Work group	DWG
13431	Set, top running door - in front of top panel	TL22_iftp_2d_29_fmldr_13431	Page: FFA16_B2_0112	Yes	Yes
